ARCHITECTURE GUARDRAILS & PERFORMANCE GUARANTEES

✓ Zero-Zapier Latency: Direct v1 webhooks execute in <150ms with HMAC-SHA256 validation, eliminating multi-step Zapier polling delays and task tier fees.

✓ Spam Act 2003 & TNZ Guard: Instant 'STOP' interception automatically suppresses outbound SMS queues and syncs opt-out flags to Pipedrive.

✓ API Rate Limit Safe: Batch-paginated delta sync protects Pipedrive's 40–80 req/s limit with pre-aggregated dimensional tables for Power BI.
